

DENIZ AKKABAK · KLING 3.0

THE CINEMATIC GUIDE

The Handheld & *Camera-Motion* Prompt Pack

Every shake, rig and camera move that makes AI footage look filmed — with a copy-paste prompt phrase for each. No perfect, sterile shots here.

@deniz.akkabak 47 moves · shake, rig & lens reference · built for Kling 3.0

Handheld & Camera Shake

The core of a filmed look — imperfect, human, alive.

01 Handheld shaky camera

Loose, human-held motion with constant micro-correction.

PROMPT

handheld camera, subtle natural shake as if held by an operator, slight reframing, organic micro-movement

02 Subtle handheld (breathing)

Barely-there sway — realism without distraction.

PROMPT

gentle handheld sway, soft breathing motion, almost steady, motion intensity 0.2

03 Cinematic shaky camera

Stylised, weighted shake with intent — film-grade, not random.

PROMPT

cinematic handheld, deliberate camera shake with weight, dramatic sway, anamorphic 35mm, motion intensity 0.5

04 Documentary handheld

Observational, reactive framing that chases the action.

PROMPT

documentary handheld, reactive reframing, follows the subject, natural shake, 35mm

05 Run-and-gun / chaotic

Aggressive, fast, energetic — panic and action.

PROMPT

chaotic handheld, fast erratic shake, quick reframes, urgent energy, motion intensity 0.8

06 Shoulder-rig operator

Camera carried on a shoulder — footstep bounce and sway.

PROMPT

shoulder-mounted camera, operator weaving with the subject, footstep bounce, organic sway

07 POV handheld (first person)

The camera is the character's eyes, scanning a space.

PROMPT

first-person POV handheld, camera looks around as if through the character's eyes, natural head motion

08 Found-footage / camcorder

VHS jitter, heavy grain, chromatic aberration.

PROMPT

VHS camcorder footage, handheld jitter, heavy grain, chromatic aberration, timestamp overlay

09 Vérité / news handheld

Raw, on-the-spot reporting with focus hunts.

PROMPT

news-style vérité handheld, slight focus hunt, quick zoom adjust, unpolished realism

10 Micro-jitter

Fine high-frequency vibration that revives a near-static shot.

PROMPT

subtle micro-jitter, fine high-frequency vibration, otherwise locked frame

11 Impact / earthquake shake

Sudden violent jolts for explosions and impacts.

PROMPT

violent camera shake on impact, sharp jolts, debris, frame trembles, motion intensity 0.9

12 Bodycam

Low chest-mounted, bouncy walking motion, wide lens.

PROMPT

bodycam footage, low chest-mounted angle, bouncy walking motion, wide-angle distortion

13 Selfie / UGC handheld

Arm's-length casual vlog sway, front-facing.

PROMPT

selfie handheld, arm's-length front-facing, casual vlog sway, natural shake

14 Whip-pan (handheld)

Fast snap between subjects with motion blur.

PROMPT

fast handheld whip-pan, motion blur streak, snap to a new subject

15 Locked-off (anti-pattern)

Dead-still tripod — the look to avoid for realism.

PROMPT

locked-off tripod, perfectly stable, no camera movement — (use as a deliberate contrast only)

SECTION 02

Vehicle & Mounted Rigs

Rigid mounts where the world moves, not the operator.

16 Camera fixed to car

Rigid mount; the car stays steady, the world rushes past.

PROMPT

camera rigidly mounted to the car, vehicle steady in frame, background rushing past, subtle road vibration

17 Hood / bonnet mount

Faces back at the windshield and driver.

PROMPT

hood-mounted camera facing the driver through the windshield, road streaking behind

18 Hostess tray / side mount

Side profile of the car with blurred asphalt.

PROMPT

side-mounted hostess-tray rig, profile of the moving car, motion-blurred asphalt

19 Car-to-car tracking

Chase rig filming another moving vehicle.

PROMPT

car-to-car tracking shot, matched speed, locked on the chasing vehicle, dust trail

20 Low wheel mount

Ground-level rig near the tyres for raw speed.

PROMPT

low wheel-level car mount, tarmac blur, intense sense of speed

21 Interior dashboard mount

Inside the cabin — driver plus road through glass.

PROMPT

dashboard-mounted interior shot, driver in frame, windshield reflections, passing lights

22 Drone / aerial

Smooth high reveal across a wide landscape.

PROMPT

aerial drone shot, slow rise revealing the landscape, smooth glide, wide vista

23 FPV drone

Fast, diving, immersive racing-drone flight.

PROMPT

FPV drone, fast diving flight, swooping through gaps, immersive speed, one continuous move

24 Crane / jib

Vertical sweep up or down for scale.

PROMPT

crane up, rising reveal over the scene, smooth vertical sweep

25 Steadicam follow

Floating, ultra-smooth follow behind the subject.

PROMPT

steadicam follow, floating smooth motion behind the subject, no shake

26 Gimbal glide

Stabilised lateral glide alongside the subject.

PROMPT

gimbal glide, smooth lateral tracking, stabilised, gentle ease

27 Cable cam

Straight-line glide along a wire over the action.

PROMPT

cable-cam glide, straight smooth path above the action

28 Snorricam

Rig fixed to the actor — body still, world swings.

PROMPT

snorricam rig fixed to the actor, body locked in frame, world spinning around them, disorienting

29 Underwater

Buoyant drift with refracted caustic light.

PROMPT

underwater camera, buoyant drift, caustic light rays, slow sway

SECTION 03

Classic Camera Movements

The grammar of motion — one move per shot.

30 Dolly in / push-in

Slow approach that builds intensity.

PROMPT

slow dolly push-in toward the subject, building intensity, 0-5s

31 Dolly out / pull-back

Retreat that reveals the wider context.

PROMPT

slow dolly pull-back, revealing the wider environment

32 Dolly zoom (vertigo)

Dolly plus counter-zoom — background warps.

PROMPT

dolly zoom, push in while zooming out, unsettling background warp, vertigo effect

33 Tracking / trucking

Lateral move parallel to the subject.

PROMPT

lateral tracking shot, camera trucks alongside the walking subject, 35mm

34 Pan (left / right)

Horizontal pivot from a fixed point.

PROMPT

slow deliberate pan from left to right across the skyline

35 Tilt (up / down)

Vertical pivot from a fixed point.

PROMPT

slow tilt up from the feet to reveal the character

36 Pedestal

Camera body rises or lowers vertically.

PROMPT

pedestal up, camera rises straight vertically, framing holds

37 Orbit / arc

Circles part-way around the subject.

PROMPT

slow 90-degree orbit around the hero, subject centered (avoid full 360 — it warps)

38 Overhead / top-down

Bird's-eye looking straight down.

PROMPT

top-down overhead shot, bird's-eye, symmetrical composition, slow descent

39 Low-angle hero

Looking up for power and scale.

PROMPT

low-angle shot looking up at the subject, towering, dramatic

40 High-angle

Looking down for vulnerability.

PROMPT

high-angle shot looking down, subject small in the frame

42 Crash zoom

Sudden fast optical zoom-in for emphasis.

PROMPT

crash zoom, sudden fast zoom-in on the face, snap emphasis

41 Slider macro

Tiny lateral move across close detail.

PROMPT

macro slider, slow lateral move across the textured surface, shallow focus

SECTION 04

Lens & Focus

Movement-adjacent moves that read as cinematic.

43 Rack focus

Shift focus between foreground and background.

PROMPT

rack focus from foreground to background, shallow depth of field

45 Anamorphic flare

Wide frame with horizontal lens flares.

PROMPT

anamorphic 35mm, horizontal lens flares, wide cinematic frame

44 Follow focus

Keep a moving subject sharp as it travels.

PROMPT

follow focus on the moving subject, shallow 35mm, soft background

46 Shallow depth of field

Subject sharp, creamy bokeh behind.

PROMPT

shallow depth of field, creamy bokeh, subject isolated

SECTION 05

Intensity, Rules & the Formula

How to phrase any move so Kling 3.0 actually obeys.

Motion intensity

0.2 subtle sway · 0.5 cinematic shake · 0.8 chaotic energy

One move per shot

Two moves in one prompt cancel out — the model achieves neither.

Slow beats fast

Fast moves warp and trail; use "slow" or a time range like 0-5s.

Time-range it

Pin pacing with "0-5s slow push" instead of vague "moves".

THE PROMPT FORMULA

① Subject & action → ② Camera & motion → ③ Lens & light → ④ Texture & mood

UNIVERSAL NEGATIVE PROMPT

tripod-stable, over-smoothed, gimbal-perfect, warping, jitter trails, double camera move
